

I would certainly be in support of S4F taking on new larger and more accessible premises in a suitable location in Cornton. As a local GP I am very aware of the need for services such as S4F as we see increasing number of children and young people, many of whom have experienced adverse life events and trauma ,needing mental health support. In this area the NHS Mental Health services for children and adolescents are overwhelmed and for us, being able to signpost young folk to a local organisation, such as yours is very important .

Accessible parking, entrances , more space and an outdoor area will all help improve access, and hopefully allow your organisation to expand and include new or outdoor activities all with an aim to improve mental health and relieve stress.

I would therefore fully support your proposal and look forward to hearing about how your future plans unfold.

Kind regards,
