1.0 Key Messages

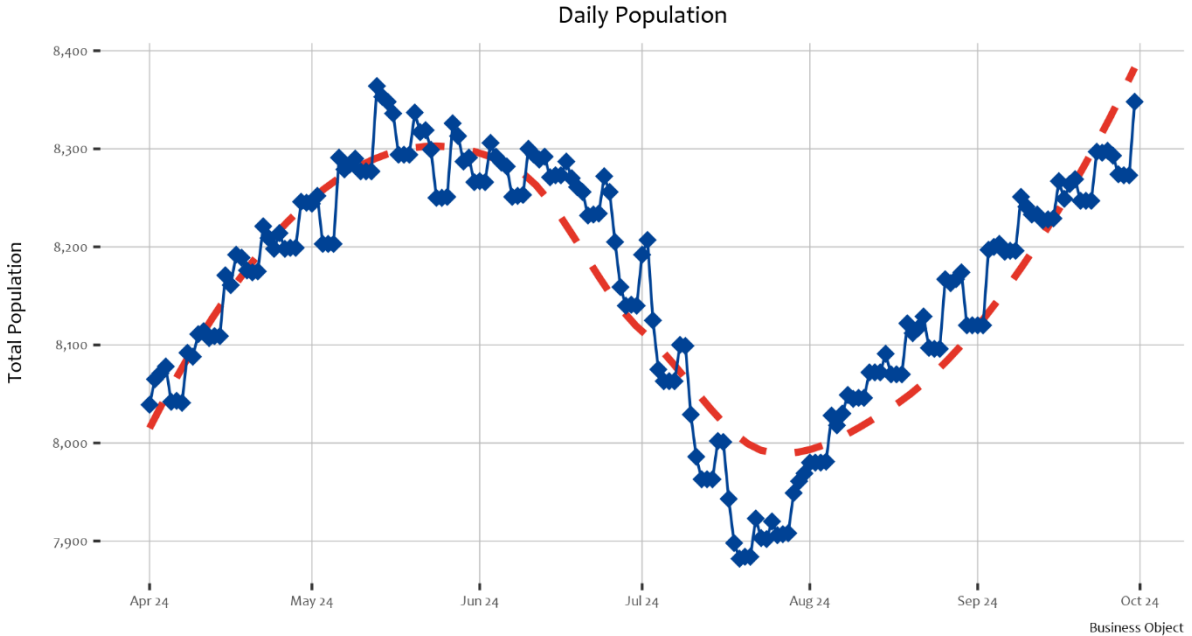

Key messages drawn from this quarterly report are as follows:

- The weekly average population increased by 1% in Quarter 2 24/25 compared to the end of the previous quarter. Compared to the same period last year, the prison population increased by 2.7%.
- The remand population rose by 1.2% in Quarter 2 24/25.
- The long-term population continued to increase while short-term population decreased as a result of emergency early release.
- The women's prison population increased by 9.3% between the first week of July and last week of September.
- The population of those with a history of sexual offending has continued to increase in Quarter 2 24/25.
- Single cell occupancy increased in Q2 24/24 compared to Q1 24/25.
- In reviewing the characteristics of those in our care in Q2 24/25, the majority of the prison population were male (95%), heterosexual (89%), had a marital status of single (77%) and were white (93%).
- The national rate of imprisonment in Scotland increased to 0.2% at the end of September. Rates of imprisonment equal to or above the national rate were observed in 11 of 32 Local Authorities.
- 42% of those in our care come from the 20% most deprived areas of Scotland.

General Enquiries Email: SPSDataAnalysis@prisons.gov.scot

2.0 Prison Population

The daily prison population reduced from 8,192 on 1st July to 7,882 on 19th July, as a result of the [Emergency Early Release process](#), and increased quickly throughout August and September, reaching 8,348 at the end of the month. Overall, the daily prison population increased by 2.6% at the end of Q2 24/25 compared to the end of the previous quarter.

The weekly average prison population increased by 1% in Q2 24/25 compared to the last week of Q1 24/25. The graph below illustrates that the weekly average population in Q2 24/25 increased compared to the same period last year. The average prison population in Q2 23/24 was 7,886 and in Q2 24/25 was 8,110. This represents an increase of 2.7% in Q2 24/25 compared to Q2 23/24.

The Scottish Prison Service (SPS) publishes Prison Population Reports illustrating the population in custody broken down by custody type, gender, and age, as well as the population on Home Detention Curfew by gender. The Prison Population Reports can be found on the links below:

[Prison Population Report – Weekly time series](#)

[Prison Population Report – Annual prison Population](#)

3.0 Complexities of Population

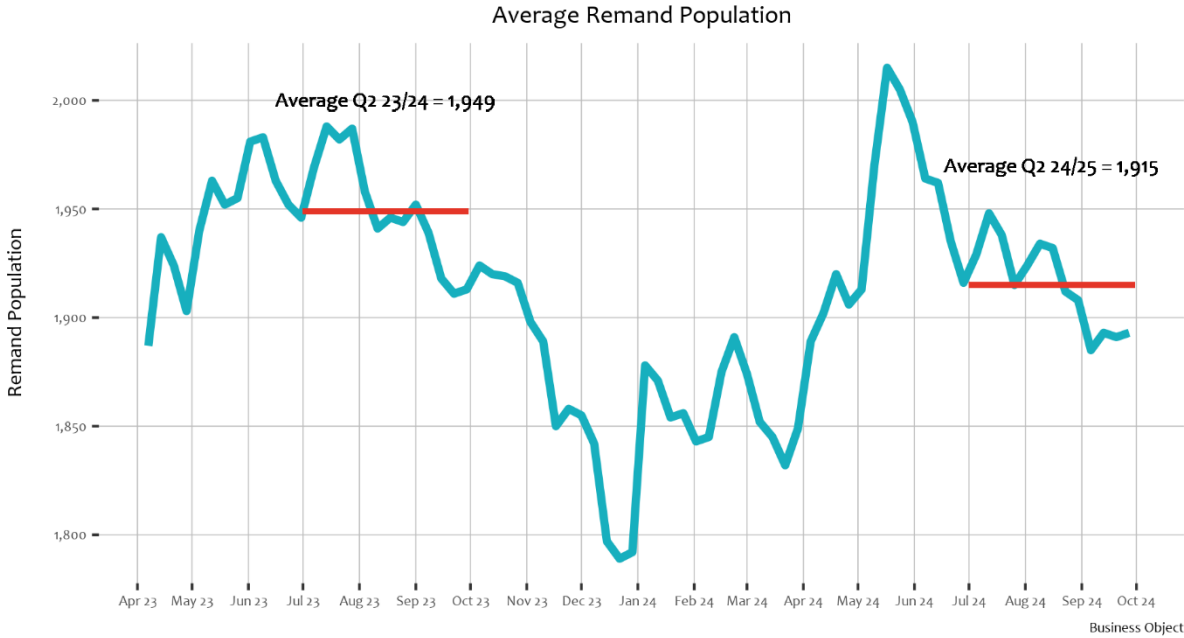

The rising overall population numbers are of concern in terms of ongoing management when we move close to population and design capacity; however also of note is the rising complexity of Scotland’s prison population. Many individuals need to be accommodated separately for a variety of reasons i.e., due to people’s legal status, gender, offence type, protection status, and/or health care needs, as well as residents with individual management needs.

The number of those in our care who must be accommodated separately decreased between end of July and end of September. An average of around 61.6% of the prison population, or 4,991, individuals needed to be accommodated separately in Q2 24/25, compared to 59.8% of the prison population, or 4,918 individuals in the previous quarter.

4.0 Legal Status (Sentenced & Remand)

The remand population decreased by 1.2% in the last week of Q2 24/25 compared to the last week of the previous quarter. Compared to the same period last year, the remand population reduced by 1.7%, from an average of 1,949 in Q2 23/24 to an average of 1,915 in Q2 24/25.

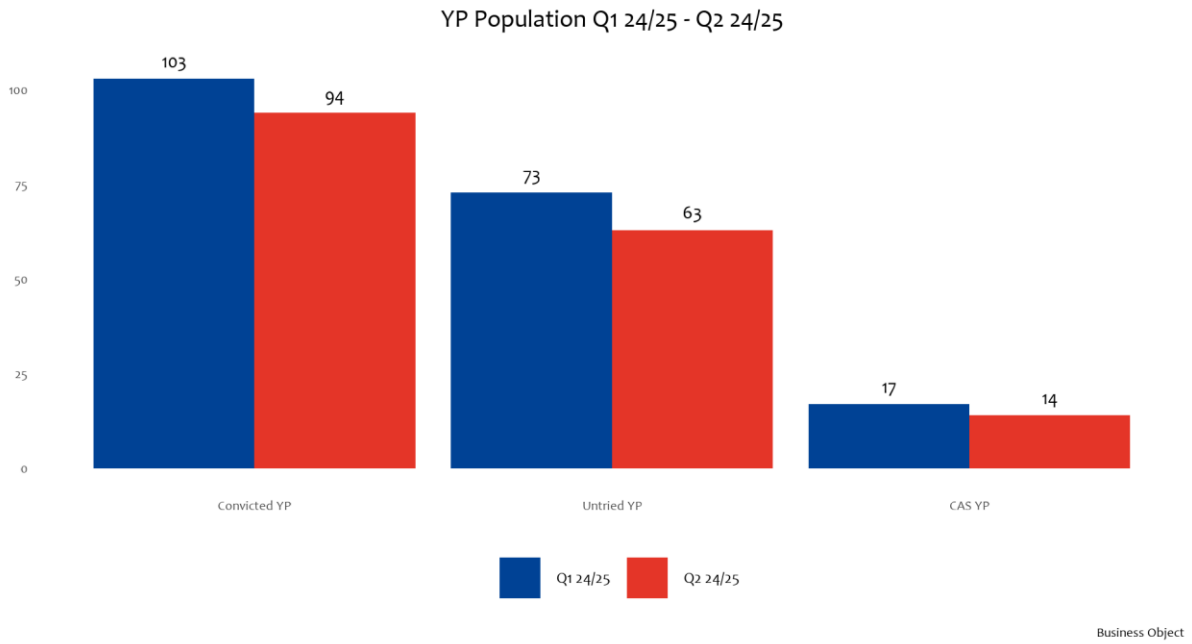

The number of those on remand remains high compared to the pre-pandemic period. In Quarter 2 24/25, the remand population accounted for 23.6% of the total prison population. High numbers of individuals on remand can create management issues for establishments, such as people having to move to convicted halls early; and long periods on remand mean that individuals spend longer without access to the full regime.

The long-term population increased by 2.6% in Q2 24/25 compared to the previous quarter, while the short-term population decreased by 7.5% in the same period. Life sentences (including OLRs) remained broadly stable.

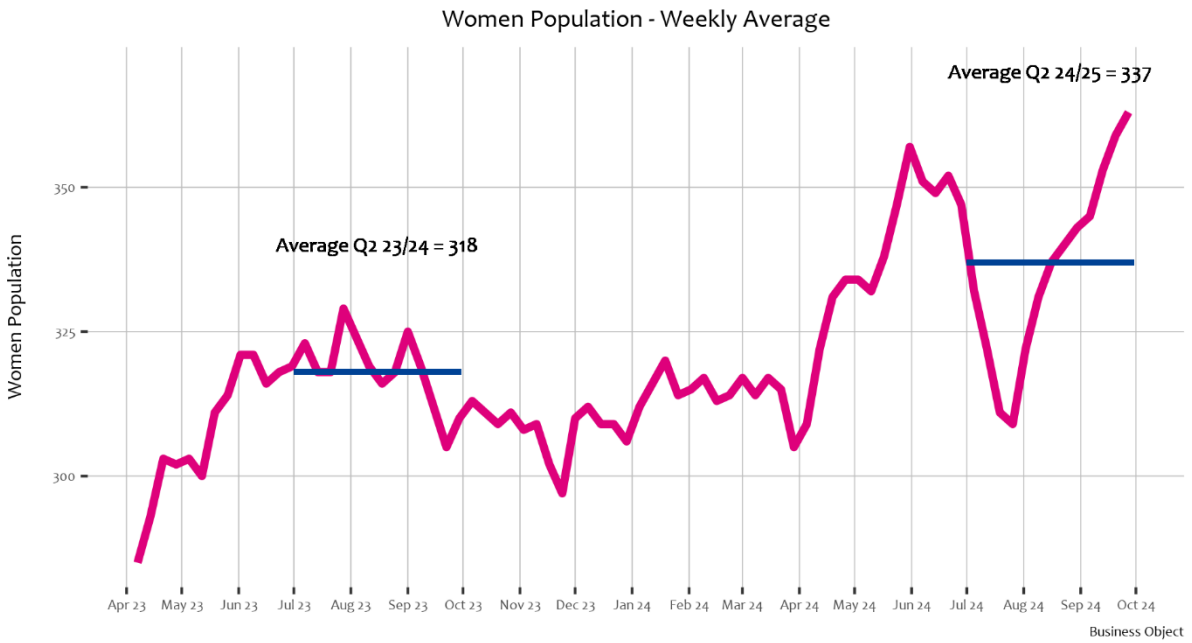

5.0 Young People in our Care

The quarterly Young People (YP) average population reduced from 193 in Q1 24/25 to 171 in Q2 24/25, this is a decrease of 11.4%. As observed below, Convicted and Untried YP decreased by 8.7% and 13.7% in the period, respectively.

6.0 Women in our Care

The weekly average women’s population decreased in July and increased throughout August and September. Overall, this increased by 9.3% between the first week of July and last week of September. Compared to the same period last year, the quarterly average female population increased from 318 in Q2 23/24 to 337 in Q2 24/25, an increase of 6%. In the same period, the male population increased by 2.5%.

7.0 Equality and Diversity

The Scottish Prison Service aims to provide accessible services to meet the needs of those in our care. This means an ongoing commitment to promote equal opportunities through policies and strategies to promote equality throughout all our establishments. The following data presents an overview of the diversity of the 8,376 people in our care on 30st September 2024.¹

Information regarding religious affiliation is not robust enough to publish at this stage. Further Equality and Diversity reports are available [here](#).

Affirmed Gender

SPS defines affirmed gender as the gender in which a person lives their day-to-day life. It may differ from the gender assigned at birth, which is the gender a person was originally registered as on their birth certificate. Non-binary individuals identify themselves as having no gender or as being on a gender spectrum² between man and woman. Gender-fluid is defined³ by “not having only one gender or moving freely between genders.”

In Q2 24/25, 95% of the people in our care were recorded as men and another 4% as women. Trans men, trans women and non-binary/gender-fluid combined accounted for less than 1% of the total population. In total, there were 24 trans people in custody at the end of Q2 24/25.

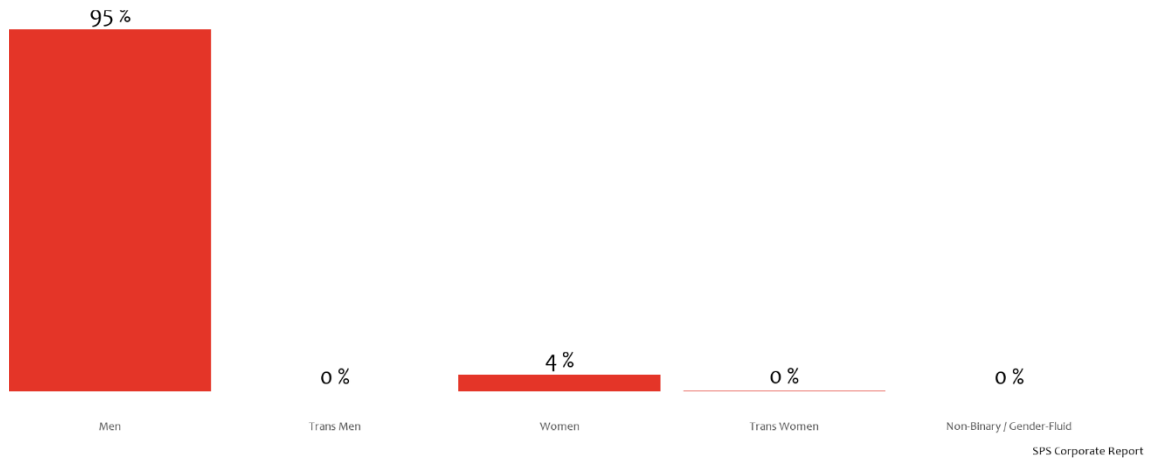

¹ The Public Information Page is a working document. The inclusion of data on protected characteristics is being kept under review to ensure the public scrutiny requirements are met whilst protecting the privacy of those in our care.

Social Gender

Sexual Orientation

Most of the people in our care declared themselves as heterosexual, 89%. Bisexuals, gay men and gay women comprised 2%. Another 3% preferred not to disclose while a further 6% were not obtained. More details are illustrated in the chart below.

Sexual Orientation

Age Group and Marital Status

The chart below illustrates the prison population in Q2 24/25 by age group and marital status. The highest age group continues to be those aged between 31 and 40 years old (37%), while the lowest proportion is individuals over 70 old, with 1%.

Most of the people in our care reported themselves as single in Q2 24/25, 77%. Another 8% reported as “Common Law (or cohabitation with a partner)”. Married people accounted for 7%.

Ethnic Group

In Q2 24/25, 93% of the prison population declared themselves as white. African people comprised 1% while Asian, Asian Scottish or Asian British people comprised 3%. Those who declared themselves Caribbean or Black were 1%. Those who declared themselves as Other Ethnic Group and Mixed or Multiple represented 2% and 1%, respectively. More details can be observed in the chart below.

SPS Corporate Report

Disability

Ten percent of the people in our prisons have told us that they have a disability. Another 87% did not report any disability and 2% opted not to disclose.

Disability	
Yes	10%
No	87%
Choose not to Disclose	2%

8.0 Protection Populations

There are people with a history of sexual offending in each of Scotland’s prisons. This graph illustrates the extent of the accommodation issues in terms of this prisoner group, which impacts on the operational running of each prison, as this category of prisoner must be separate from the mainstream population.

The population of those with a history of sexual offending in custody increased by 4.5% in Q2 24/25, compared to the previous quarter. In average, the population of those with history of sexual offending in Q2 24/25 increased by 13.6% compared to the same period last year.

Non-Offence Protections (NOPs) also need to be located and managed separately from mainstream prisoners due to being identified as those who are considered at risk should they associate together. There are a number of factors which contribute to this such as previous or current charges which have received negative media attention and could endanger the individuals, those previously employed in the Police or Prison services or those who have generated enemies and/or debts to an extent that there may be a risk to the individual should they be allocated into a mainstream residential area. This negatively impacts the operational running of the prison because NOP prisoners sometimes need to be accommodated *and* managed separately, depending on the severity of need for protection status.

The number of individuals within the NOP population remained at a quarterly average of 531 in Q1 and Q2 24/25.

9.0 Geography of Imprisonment in Scotland

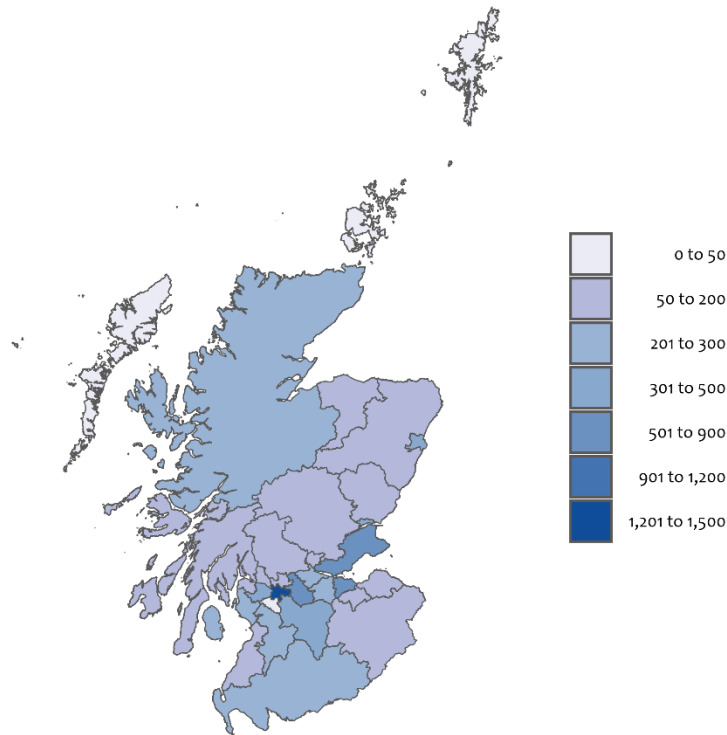

When considering the prison population by Local Authority (LA), Glasgow City continued to have the largest number; 1,515 individuals in custody, comprising 18.1% of the total prison population at the end of Q1 24/25. The City of Edinburgh has the second largest prison population, with 672 individuals, followed by North Lanarkshire and Fife with 553 and 530 individuals, respectively.

Na H-Eileanan Siar, Shetland Islands and Orkney Island have the smallest number of individuals in custody. The three Local Authorities together comprise 0.4% of the total of residents in prison.

According to the Prisons` Records, 4.8% of the people in our care recorded an address outwith Scotland, therefore they are not associated with any LA. Another 0.1% do not have an identifiable address or do not have any address recorded in our system.

The map below illustrates the number of people in custody by LA on 30st September 2024.

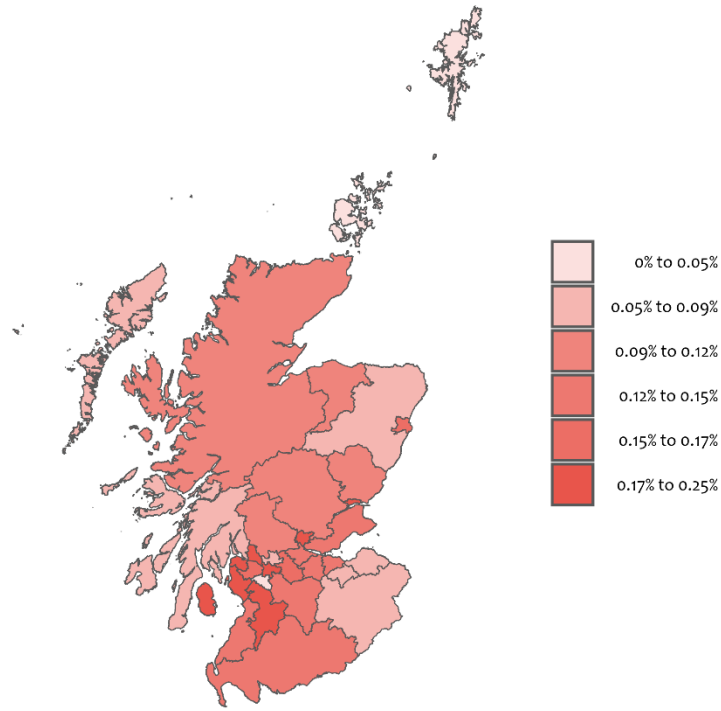

Number of People in Custody by Local Authority

The national rate of imprisonment in Scotland⁴ was 0.2% at the end of March. Rates of imprisonment equal or above the national rate were observed in 11 of the 32 LAs.

The map below illustrates the rate of imprisonment by LA on 30st September 2024.

Rate of Imprisonment by Local Authority

Prison Records

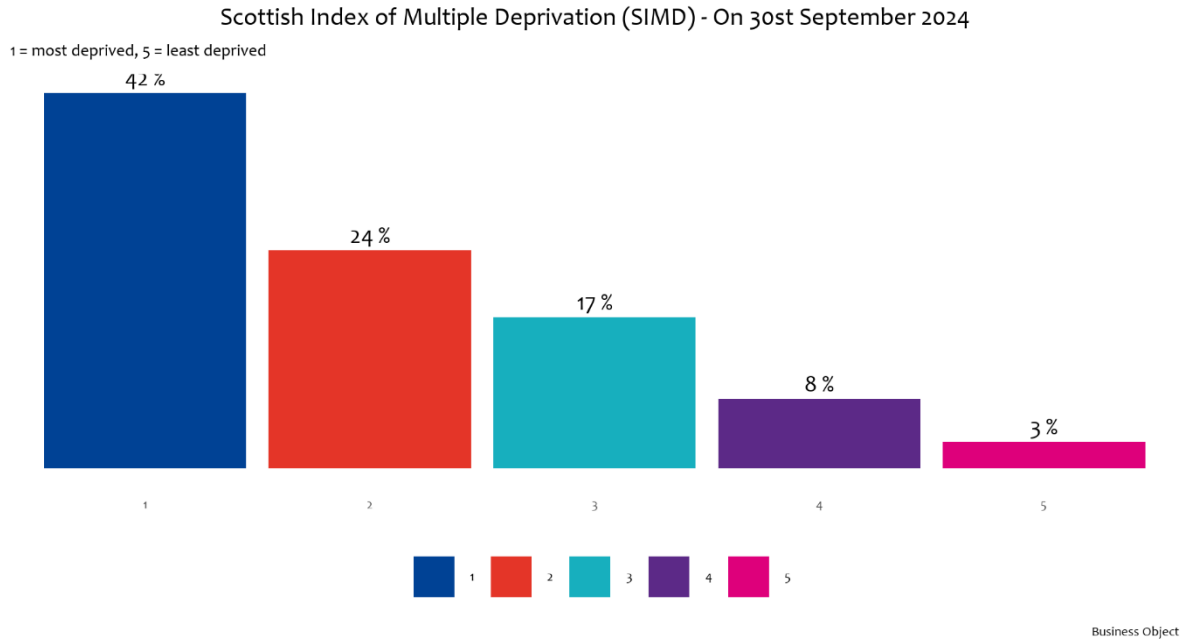

⁴ The Scottish population figures used to calculate the rate of imprisonment was obtained from [Scotland's Census 2022](#)

The table below illustrates the total number of individuals in custody on 30st September 2024, broken down by length of sentence per LA.

	Remand + Undetermined Sentence	Short Term Prisoners - Less than 4 years	Long Term Prisoners - Over 4 Years (including Life)
Aberdeen City	100	115	139
Aberdeenshire	47	64	83

West Lothian	50	69	110
Not on Prison Records	0	<5	<5

Deprivation

The data extracted from the Prison Records on 30st September 2024 indicates that 42% of the prison population come from the 20% most deprived areas of Scotland while 3% come from the least deprived areas⁵.

⁵ The Scottish Index Multiple Deprivation (SIMD) is a relative measure of deprivation across 6,976 small areas. SIMD ranks from most deprived (ranked 1) to least deprived (ranked 6,976). This Public Information Page linked SIMD Geographical Data to the postcode of those in our care and focused on the areas below 20% most deprived data zones in Scotland.

10.0 International Comparisons

The figure below shows the prison population per 100,000 people for a selection of European countries⁶. Scotland has a rate of 149 prisoners for every 100,000 people.

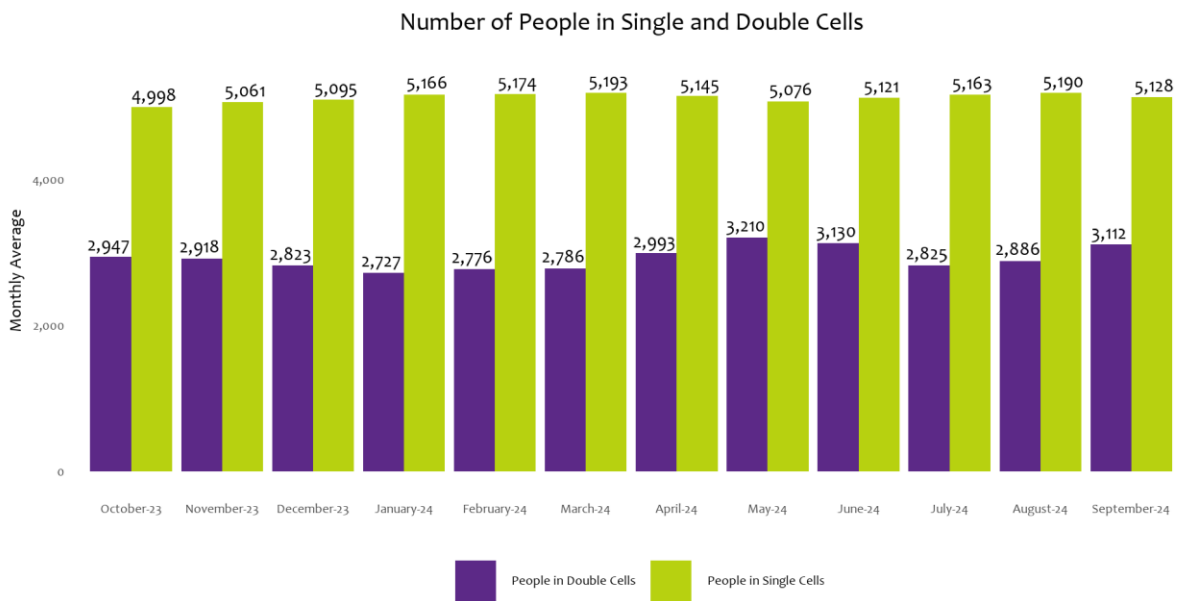

⁶ [World Prison Brief](#), accessed in September 2024.

11.0 Prison Estate & Configuration

At the end of September 2024, nine establishments were operating over the agreed Temporary Operating Capacity (TOC). Another four establishments were operating very close to TOC.

In Q2 24/25, the monthly average number of people accommodated in single cells slightly reduced from 5,163 individuals in July to 5,128 in September. Between October-23 and September-24, the average number of people accommodated in single cells increased by 2.6%. In the same period, the average number of people accommodated in double cells increased by 5.6%.

PR2

Current Single Cell Occupancy (SCO) figures illustrate the impact that the rising and increasingly complex population is having on the ability to provide individuals with single cells. In the short term, SPS is unable to increase the capacity to offer individuals single cells, as this would require building new establishments or re-designing existing ones. In Q2 24/25, SCO decreased from an average of 64.6% in July to 62.2% in September.

12.0 Staffing Levels

SPS currently has 5,065 employees (4,765.8 full-time equivalent (FTE)), as of the 30th September 2024, this is an increase from 30th June 2024 (4,993 employees, 4,700.40 FTE). During quarter 2 SPS has had new cohorts of Operational Officers and Residential Officers start. This has contributed to the increase of employee headcount and FTE.

Turnover

Turnover is a focus for SPS with the priority being having a better understanding as to why employees leave. In Q2 24/25, there were 103 employees who left SPS which is a decrease compared to than quarter Q1 24/25. The top five leaving reasons in quarter 2 were Job Opportunity, Personal Reasons, Retired-Normal Retiral Age, Capability Health, and Resignation General they equate to 70.87% of quarter 2 leavers.

Absence

Staff absence is one of the main priorities for SPS. The sickness absence levels have slightly increased from 15.6 Average Working Days Lost (AWDL) in September 2023 to 16.4 Average Working Days Lost (AWDL) in September 2024. The Average working days lost are the number of FTE days lost to sickness absence by SPS employees within a 12-month rolling period.

The calculation for this is:

$$AWDL = \frac{\text{Total number of working days lost to absence}}{\text{Total FTE for all SPS employees}}$$

13.0 Open Estate

To progress to less secure conditions, an individual has to undergo case management and the level of risk for this decision must be agreed by the SPS and key partners. All convicted population can be eligible once the criteria is met. This process is managed for adult males via Castle Huntly, HMP&YOI Polmont for Young People and HMP Stirling for the female estate.

The population of Castle Huntly (also known as the Open Estate) increased from an average of 168 in May to 170 in August, then reducing to 162 in September.

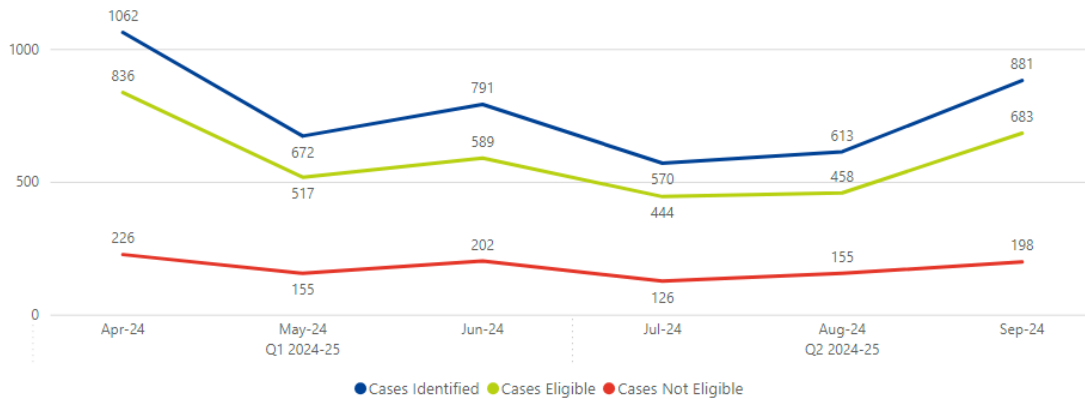

Identifying people held in less secure conditions within HMP&YOI Polmont and HMP Stirling is complicated by the structure of management information held by SPS; work is underway to report upon these populations.

14.0 Home Detention Curfew (HDC)

The Emergency Early Release scheme impacted the HDC process due to individuals eligible for emergency release being the same individuals eligible for HDC. The graphs below demonstrate that there was a decrease in individuals on HDC from the start of the year to July (when the scheme ended); numbers started to recover towards the end of Q2.

When comparing HDC figures for Q1 with Q2, the total number of cases that were identified has decreased by 18.3% from 2,525 to 2,064. This can be broken down to a 24.4% decrease in the number of cases which are eligible from 2,097 to 1,585, and an decrease of 17.8% in the number of cases which are not eligible from 583 to 479.

HDC - Cases Identified - Q1 2024/25 - Q2 2024/25

There was a total number of 97 individuals released on HDC in Q2. This is a 11% decrease (12 individuals) from Q1 which was a total of 109. At the end of Q2 there were 100 individuals on HDC release. This is a decrease of 8.3% (9 individuals) from Q1 where there were 109 individuals on HDC release.

HDC - Number Released - Q1 2024/25 - Q2 2024/25

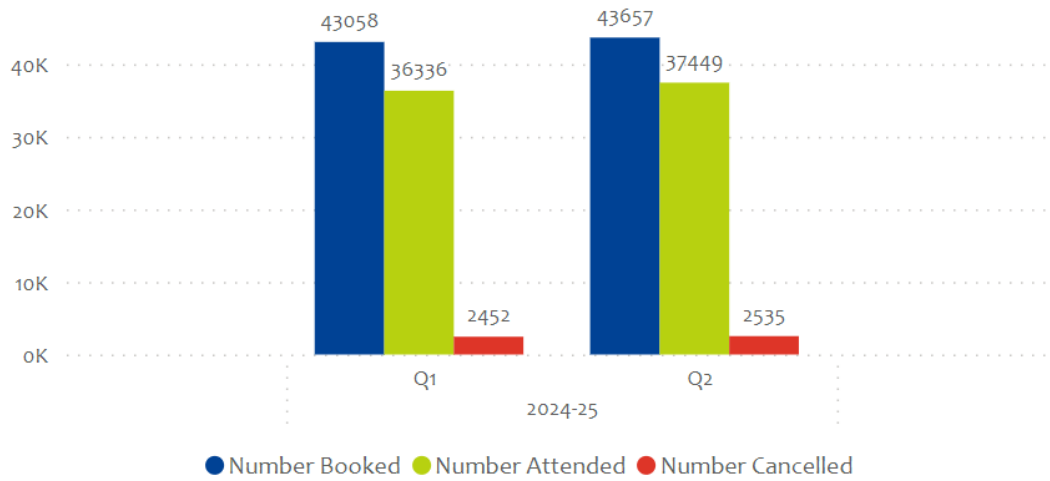

15.0 Face to Face & Virtual Visits

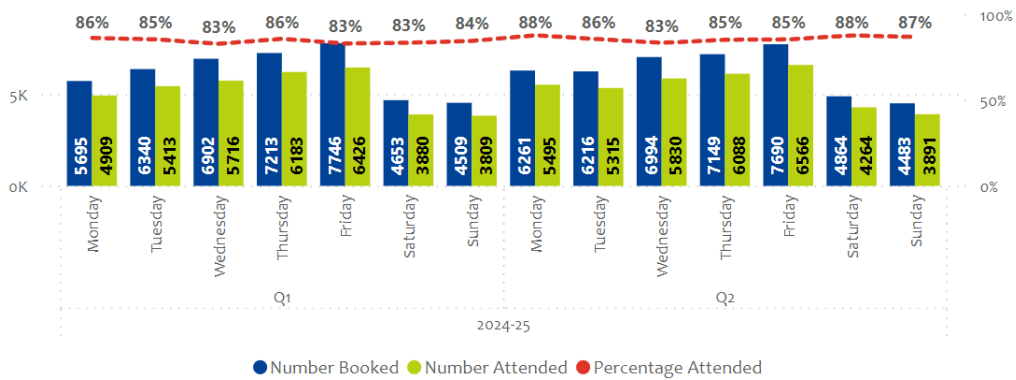

Face to Face

Face to Face visit numbers continue to be stable through quarters 1 and 2, with over 43,000 booked each quarter, of which between 83% and 87% were then attended.

Face to Face - Visit Outcomes - Q1 2024/25 - Q2 2024/25

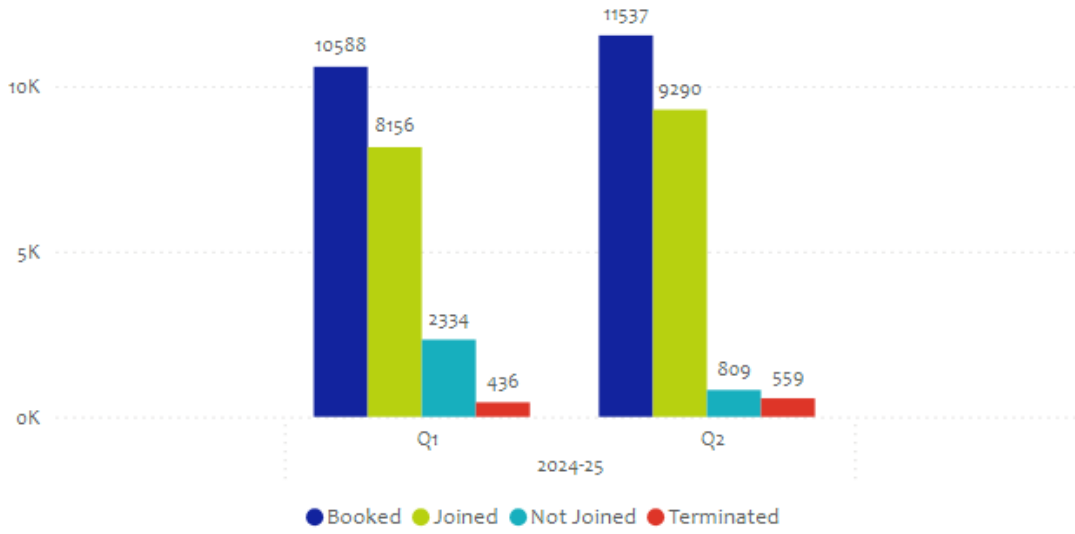

Face to Face - Booked vs Joined vs % Joined - Q1 2024/25 - Q2 2024/25

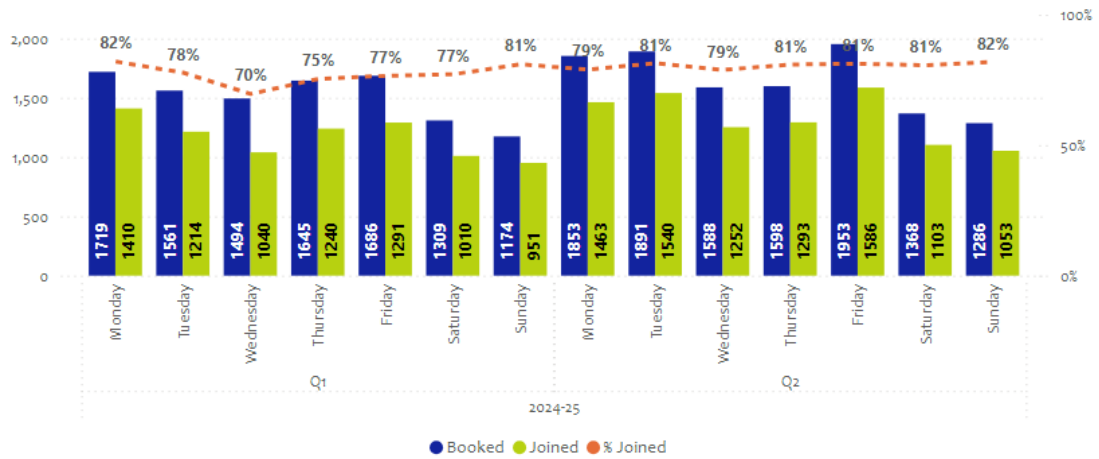

Virtual Visits

Q2 shows that the number of Virtual Visits had increased from Q1 with an increase of 8.9% in booked visits and 13.9% in joined visits. There was also a large decrease in the number of visits not joined, down by 65.3%. However, there was also an increase of 28.2% in the number of terminated visits.

Virtual Visits - Visit Outcomes - Q1 2024/25 - Q2 2024/25

Virtual Visits - Booked vs Joined vs % Joined - Q1 2024/25 - Q2 2024/25

16.0 Additional Information and Useful Links

About this report

The Public Information Page (PIP) is a quarterly report published by the Scottish Prison Service (SPS) to provide transparency about various metrics related to the running of prisons in Scotland. Data is extracted from SPS management information systems and compiled into the PIP report each quarter. Because this data comes from live systems and is extracted at various points throughout the year, it can differ from other similar data in the public domain, such as the Scottish Prison Population Statistics. The data compiled in this report is not subject to the same level of quality assurance as the official statistics, although every effort is made to ensure its accuracy before publication.

We seek to be as open and transparent as possible, while also upholding our statutory obligation to ensure those in our care have their personal information protected. We have improved the way in which we collate and present data on our transgender population and, following advice from information governance experts, will only provide information on the total number of transgender people in our care. We have also applied disclosure control throughout the report where small numbers might mean that individuals could be identified.

Other data sources

- **Parliamentary Questions**

A full list of Parliamentary Questions answered in the Scottish Parliament on the subject of prisons is available from the Scottish Parliament website [here](#).

- **Corporate Plan**

The Corporate Plan identifies a set of strategic themes and outcomes, which defines and shapes SPS priorities over the duration of that Plan. This is currently on the SPS website [here](#).
